PERSONAL PROJECTS

Ecommerce Website

I made a website using HTML and CSS . The main motive of this project is to know how the HTML and CSS works. I worked on frontend of the website.

Location Tracking App

Me and my group members made a location tracking app "Route Finder" using Java in android studio . The main motive of this project is to track the Location of the college bus and show on the map.

ORGANIZATIONS

Cultural Committee

I have worked as a member of Cultural Committee in Computer science engineering students association (CSESA) in my college.

Social Committee

I have worked as a member of Social Committee in Computer science engineering students association (CSESA) in my college.

CERTIFICATES

Python Programming

ACHIEVEMENTS

Runner up in Code War

Code War was a coding competition held in college . In that competition I was Runner up.
